### Course Overview

This course is aimed at introducing the power-substation layout and design to utility and industrial engineers. The course will cover substation layout, design, grounding and protection. The course will be supported by practical design examples.

### Course Objective

To improve the skills of engineers involved in design, operation and maintenance of electric power substation. A degree in electrical engineering is recommended to gain maximum benefit from the course

### Who Should Attend?

Engineers involved in design, operation and maintenance of power substations. A degree in electrical engineering is recommended to gain maximum benefit.

### Course Outline

- **Introduction**
- **Power Systems**
- Substations of Voltages 230 kV and Above**
- Substation Busbars
  - **Substations of Voltages up to 220 kV**
- Transformer, Reactors and Regulators Transformers**
- Reactors**
- Regulators**
- Outgoing and Incoming Overhead Lines**
- Tower Selection
  - **Substation Grounding**
- Zones of Protection

**-Circuit Breakers**

**-Reclosers, Sectionalizers and Fuses**

- **Lightning Protection**

Training Methodology

- Presentation & Slides
- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies
- Workshops
- Games & Role plays
