Course Overview

The purpose of this unit is to introduce trainees to the components, Op. and Maint. of a hydraulic system. After completing this unit, trainees should understand the basic principles of how hydraulic systems work.

Also this unit is designed to familiarize trainees with the operation of various types of cylinders and hydraulic motors in hydraulic systems. After completing this unit, trainees should be able to describe the basic components and common types of single-acting cylinders and double-acting cylinders. They should also be able to describe the basic components and operation of common types of vane motors, gear motors, piston motors, and partial rotation actuators.

Course Objective

- Explain the basic principles of hydraulic system operation
- Identify the basic components of a typical hydraulic system
- Describe the general operation of a typical hydraulic system
- Describe the basic components and operation of a single-acting load-return cylinder
- Describe the basic components and operation of a single-acting spring return cylinder
- Describe the basic components and operation of a vane motor

Who Should Attend?

Mechanical, Operation, Production, and Maintenance Engineers Senior Technicians should benefit from this course. Also Senior Technicians should update and refresh their knowledge by attending this course.

Course Outline

- **DESCRIBE AND EXPLAIN HYDRAULIC SYSTEM AND PRACTICAL EXAMPLES OF FLUID POWER RELATED TO STEAM AND GAS TURBINE POWER PLANT.**
- **HYDRAULIC OIL PROPERTIES AND TESTING.**
- **METHODS TO PURIFICATION HYDRAULIC SYSTEM IN POWER PLANT.**
- **METHODS OF TESTING HYDRAULIC OIL.**
- **CASE STUDIES COVER ALL MOST TROUBLESHOOTING IN HYDRAULIC SYSTEM AT POWER PLANT [STEAM ,GAS ,COMBINED CYCLE**

Training Methodology

- Presentation & Slides

- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies
- Workshops
- Simulation
