### Course Overview

The Training will introduce delegates to the different types of pumps and valves and their associated terminology. Centrifugal and positive-displacement pumps, packing, mechanical seals and sealing systems, bearings and couplings will all be discussed. Valves for isolation and valves for control will be addressed.

### Course Objective

- Have an understanding of the different types of pumps and their associated terminology
- Have an understanding of Centrifugal and positive displacement pumps, packing, mechanical seals and sealing systems, bearings and couplings
- Have an understanding of different parameters affecting the operation of valves
- Have the ability to select the right valve for the particular application and to perform the necessary calculation for valve sizing
- Have the ability to perform troubleshooting of systems involving valves

### Who Should Attend?

- Technicians
- Supervisors
- Team Leaders

### Course Outline

#### **Pumping Systems**

#### **Pump Types and Terminology**

#### **Pump Performance**

#### **Friction in Valves, Piping & Fittings**

#### **Cavitation in pumps and valves**

#### **Positive Displacement Pumps**

#### **Reciprocating Pumps**

**Reciprocating Pump Valves**

**Rotary Pumps – scroll and gear types**

**Failure Mechanisms – identification and monitoring**

**Centrifugal Pumps**

**Pump Components**

**Achieving Pump Reliability**

**Sealing Systems**

**Bearings – failure modes and how to extend life**

**Lubrication**

**Plain Bearings**

**Valves Technology**

**Types of Valves**

**Valves Troubleshooting & Maintenance**

Training Methodology

- Presentation & Slides
- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies
- Workshops
- Simulation
