Course Overview

This program is designed for those wishing to enter the refrigeration and air conditioning industry. The units covered are designed to give practical and theory based skills in refrigeration, air conditioning and electrical work. Although the program is a pre apprenticeship program it also attracts more mature students who may wish to enter the industry as a technician.

Course Objective

Enables participants to acquire the knowledge and skills in handling A/R Projects

Who Should Attend?

Mechanical, operation, and maintenance engineers, technicians who are engaged in or intend to be familiar with rotating equipment systems and their problems are targeted. Also senior staff should update and refresh their knowledge by attending this course.

Course Outline

- Ventilation And Air-Conditioning
- Refrigeration
- Cold Storage
- Cooling Towers

Training Methodology

- Presentation & Slides
- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies

- Workshops

- Simulation
