### Introduction

Many organizations have adopted structured approaches to managing their operations through various different standards and techniques in order to manage quality assurance. This interactive training seminar will develop delegates' skills in and knowledge of quality assurance and provide them with best practices they will be able to use in improving quality assurance within their organization's including the new ISO9001.

The seminar will provide a background to the various concepts of managing quality in organizations and examine how the risks and opportunities can be successfully managed in organizations through the effective management of quality assurance.

### Objectives

**By the end of this training seminar, delegates will be able to:**

- Be aware of the history of quality assurance and standardization
- Understand the part of effective teamwork in contributing to overall quality assurance in their organization
- State different models and frameworks for quality assurance
- Recognize the importance of the customer in the quality management system
- Understand the latest international frameworks in management systems and discuss some of the benefits these can bring to organizations
- Appreciate methods for identifying and improving interaction in business processes

### Training Methodology

Participant will learn by active participation during the seminar through the use of case materials and exercises that will bring a practical understanding to the concepts of quality assurance and management. This will include the opportunity to relate the learning of the course to "real life" issues in their own organization and their experience as customers themselves.

### Organizational Impact
